## 

## MONTHLY POLL

December 2023<br>Job Greators Neutwork Houndeiton small Business Monthly poll<br>Conducted By: John McLaughlin Scott Rasmussen

## Methodology

This national survey of 400 small business employers was conducted between December 1-28, 2023. This presentation includes JCNF's SBIQ (Small Business Intelligence Quotient). The Small Business IQ Monthly Poll tracks its SBIQ, identifies key trends, and offers valuable insights into policies impacting small business employers.

All interviews were conducted online with randomly distributed invitations. The geographic and demographic profiles were structured to represent the population of small business employers in the United States. The sample of 400 small business employers has an accuracy of $+/-4.9 \%$ at a $95 \%$ confidence interval. The numbers in this presentation have been rounded and may not equal $100 \%$.

The JCNF SBIQ is calculated on a scale from 0 to 100 , with 100 being best possible conditions and 0 being worst possible conditions.
Small Business A score of 50 is neutral, anything above 50 is positive and anything below is negative. The JCNF SBIQ is based on 7 -questions:
Intelligence
Quotient Current Conditions: Employer's Business, U.S. Economy, and Climate for Small Businesses
$\begin{array}{llll}60.0 & 59.8 & 60.9 & 59.4\end{array}$

## Divergence Between Perception of Own Business \& National Economic Conditions

1. Small business employer sentiment about the economy increased in December - a modest bounce back from the series low hit in November. So What? Main Street employers experienced a moderate holiday sugar high in December, with sentiment returning to near September levels.
2. However, only 24 percent of small businesses have a favorable view of economic conditions. So What? That's the lowest proportion of Main Street businesses that have believed current economic conditions were either good or excellent all year.
3. Concern about inflation increased significantly in December—rising by eleven points. So What? Despite improvements in price stability, small businesses are still facing compounding problems from two years of high inflation.
4. Nearly 8 in 10 small businesses support federal legislation that would lower credit card "swipe fees" by fostering free market competition. So What? The Senate Judiciary Committee is holding a hearing on the Credit Card Competition Act in mid-January. Committee members should take into account overwhelming small business support for the bill.
5. In December, only one-quarter of small businesses (27 percent) said the economy is headed in a positive direction with a majority (51 percent) saying it's getting worse. So What? As we enter the new year, Main Street does not think the economy is headed in the right direction.
